EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

In Claim 39: in line 4, "an AC" has been changed to - - a non-excitatory AC- -.

In Claim 40: in line 4, "an AC" has been changed to - - a non-excitatory AC- -.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Fenster on 2/10/05.

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It lacks the duty to disclose clause for CIP applications based on the newly claimed priority.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Applicant's claim of priority to US Patent 6,571,127, which claims priority to PCT/IL97/00243, filed 7/16/1997 serves to overcome the rejections based on Ben Haim

Art Unit: 3762

et al. The Examiner concurs with Applicant's remarks regarding the personal interview discussion of Renrie.

In a follow-up interview on with Maier Fenster 2/10/05, PCT93/02743 was discussed in depth. The Examiner questioned whether the current ranges used in that Cyberonics reference would inherently create a non-excitatory effect as they appeared to overlap with the non –excitatory current ranges disclosed by applicants. Mr. Fenster indicated that current is not the sole indicator of excitability and that a myriad other factors are involved in that determination, including, inter alia, patient impedance, whether or not the outer pancreas layer is removed at implantation, etc. As such, the functionality of the controller would not be met by the prior art pulse generators, especially those as the Cyberonics device, which stimulates the vagus nerve rather than insulin producing cells.

Claims 39 and 40 were additionally discussed. The Examiner indicated that the originally filed claims differ in scope from these newly submitted claims and would require further consideration. Mr. Fenster agreed to add non-excitatory to these claims to avoid restriction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
